Release notes - v11.5

Dev release date: Sep 18, 2024

Re-release date: Oct 30, 2024

Features:

Module	Item	Zendesk ID	VOD (old)	Review-Next
Bulk Redact	Search single or multiple terms to find the hits and redact the matched terms in the PDF document.		☐	☑
Search History	You can automatically collapse the search history panel after executing a search history, saved search, or dynamic folder.		☐	☑
Coding	You can configure the sort order of coding fields to display them in a specific sequence during both individual and bulk coding operations.		☐	☑
VOD	We have updated and integrated the new logo across all modules, reports, and notifications within VOD.		☐	☑
Venio-Next Panels	The traditional "View" link is now replaced with a visually appealing eye icon across all panels in Venio-Next.		☐	☑
Review	For more efficiency, we have introduced a breadcrumb condition for search filter expressions initiated from the analyze page and sent to review page.		☐	☑
Review	You can now view the document count indicators in both Auto Folders and Static Folder trees.		☐	☑
Tagging	Sort order of the tags to display them in the specific sequence during individual and bulk tagging.		☐	☑
Search	You now have the search capability to identify documents having slipsheet image and redaction using the search expression HAS_SLIPSHEET = TRUE and HAS_REDACTION = "TRUE" respectively.		☐	☑
Redaction	System will automatically queue the redacted PDF images to generate corresponding redacted OCR text.		☐	☑
PDF Viewer	Now, you can directly view the produced images within the PDF viewer.	16965	☐	☑
PDF Viewer	System will automatically queue the document for PDF image generation when navigating to the PDF viewer.	16965	☐	☑
Report	We have added role change report where you can view the users who changed the role, user whose role is changed, and changes in the role.		☑	☑

Report	You can now see the options used during delete document in the Deleted Document Report.	16297	☑	☑
Dynamic Folder	You can now configure the sort order of the global dynamic folder to display the dynamic folder in the specified order in all the modules.		☐	☑
Upload	You can now view the data transfers (number of projects / media that currently have data uploads in progress) underway by Clients.	14368	☑	☑
Processing	You can view the EXIF data - extraction of additional metadata.	15854	☑	☑
Production	We have migrated Few options from console export to venio next UI on "Native not exported" options.		☑	☑
Notification	Type of options selected for upload will be displayed under Upload notification.	16373	☑	☑
Notification	System will also provide notifications for 'Partial Meta Extracted'.	16717	☑	☑
Report (project setting)	We have added the snapshots of project setting changes stored and available in a report.		☑	☑
Relativity One	Relativity One is now updated with following changes: • Relativity one log parser to parse different types of logs • Ability to download error and warning only logs • Separate native and fulltext import call		☑	☑
Processing	You can process cellebrite data with empty sender/participants.		☑	☑
Manual Imaging	Now, automatically Generate and Upload Images: • Selected documents (in bulk) • Show status of imaging, ability to get log if any		☐	☐
Imaging	Under Convert to image feature of review next, detailed section to show image conversion status (migration) is added.	16965	☐	☑
Production	"Overlay is coming soon" label is removed in production page		☑	☑
