			☑	☐

Bug:

Module	Item	Zendesk ID
Tagging	New tag created from bulk tagging UI not being immediately listed in the tag tree for tagging is now resolved	17274
Imaging	A validation is added in case creation so that when template for slipsheet is chosen, slipsheet should also be selected by users, else the jobs were getting stuck during imaging.	17143
Report (document delete)	Document delete report is not sorted such that the recently deleted information is on top of the deletion report is now resolved	16297
Slipsheet	If we create a slipsheet template (from VOD) and use it when creating a case from VOD, we are now able to edit the case from Venio Console.	17200
